ULTRAC VORTI

PRODUCT HIGHLIGHTS

ULTRA HIGH PERFORMANCE —

ULTRA VORTI

CONTROL AND PRECISION HAVE NEVER BEEN SPORTIER

BENEFITS

- Precise and responsive performance, especially while cornering
- Superior wet and dry braking
- Lower fuel consumption and extended tyre life

FEATURES

- Stiffer shoulder and sidewall construction.
- High-traction tread compound for increased grip
- Next generation body compounds to reduce rolling resistance

ADVANCED TECHNOLOGY

Performance oriented tread pattern

- Tread block stiffness is optimised to provide extra stability during braking
- Tyre contour with large bead area is designed for minimised deformation while cornering
- Stable centre rib and a solid outer shoulder construction for precise and responsive steering precision, even at high speeds

Maximum Comfort coupled with minimal tyre noise

- Optimized for maximum comfort through advanced simulation tools
- Specially tuned for better compression during impact

Next generation compound

- High traction tread compound amplifies grip on both wet and dry roads
- Next-generation body compounds – in body ply, apex and rim cushion – to reduce rolling resistance and enhance tyre life
